VELIKO HT MOLY GREASE is lithium based multipurpose grease fortified with 3% by wt. molybdenum disulphide for protection of moving parts under severe shock load conditions, resists water washout and give long service life. It has a very high drop melting point (up to 300°C)

PERFORMANCE BENEFITS

- Reduces friction
- Extend Bearing Life
- Increase lubrication intervals
- More Energy Efficient
- Water Efficient
- Prevent Seizure

PERFORMANCE STANDARDS

- Meets NGLI-3 Grade and NGLI-2 Grade
- Meets IS: 12203:1993 Grade 3

APPLICATIONS

Recommended for the industrial applications where lithium based grease is required with 3% by wt. molybdenum disulphide. Also recommended in lubrication of certain automobile parts where shock loading occurs.

TESTING SPECIFICATION

Colour	Brownish/Black
Structure	Slightly Tacky
Soap Type	Synthetic
NLGI Grade	2
Freezing Point	-30
Drop Point °C Min	300
