

“VELRUST-200” is water soluble cleaning agent cum preservator recommended to clean balls and bearing components before heat treatment.

**FEATURES**

- It is ecofriendly, non solvent and non toxic
- Free from ethanol amines and sodium nitrites
- Having required stable pH
- Easily soluble in water

**BENEFITS**

- It removes chemicals, oils and dust particles and form micro film which prevents rust formation from atmospheric and water corrosion.
- It is compatible with soft and hard water

**APPLICATIONS**

Recommended to clean balls and bearing components before heat treatment.

**TESTING SPECIFICATION**

Appearance	Clear
Color ASTM	Colorless
pH with 1% solution	9
Anti rust property	Pass
Anti Corrosion property	Pass
Ethanol amine content %	Nil
Nitrite %	Nil
Hard Water Test	Passed up to 600 ppm
Viscosity @ 40 °C	2 cST
