

VELRUST-500

“VELRUST-500” is solvent base fluid mainly used as temporary rust preventive agent in industry.

FEATURES

- It consists of film forming additives, rust inhibitors and water displacing agents.
- On Evaporation of the solvent thin soft film or coating is obtained.
- This coating protects from rust and corrosion problems.

BENEFITS

- A super protection of quality from environment giving thin transparent film.
- Does not react with metals, no stain problems, extends appearance of product.
- Easily removed by solvent again.
- High adhering property of film, which doesn't damage easily.
- High wetting property covers all surface area easily.

APPLICATIONS

Recommended for wide range of single items protections. It is also used on interior surface where elaborate protection is unnecessary(Because of the need for evaporation of the solvent), it should be used where small orifice cavities occur.

PERFORMANCE SPECIFICATION

These product meet and exceed BIS 1154-1957 Specification.

TESTING SPECIFICATION

Flash Point	52
Non Volatiles wt%	22
Copper Strip Corrosion	1
Water Displacement Test	Pass
Finger Print Neutralization test	Pass
Coverage M ² /Ltr	145
