

# VELRUST-700

“VELRUST-700” is specially made with corrosion preventive additives and water displacing agents.

## **FEATURES**

- It has good sealing property hence it is suitable for small critical object having grooves and cavities.
- It is a solvent base which gives more effective film than velrust-555
- It gives protection against long dewateration.

## **BENEFITS**

- Dual Use-for inter process treatments as well application on précised parts at packaging stage
- Super rust preventive property in any season
- Cost effective
- Passes finger print test

## **APPLICATIONS**

Recommended for ball bearing industry. For phosphatized components. For small industrial precise jobs. Highly corrosive sensitive components. For inter process material treatment by spraying or cold method. For final stage before packing

## **PERFORMANCE SPECIFICATION**

These product meet and exceed BIS 1154-1957 Specification.

## **TESTING SPECIFICATION**

Flash Point	70
Non Volatiles wt%	0
Copper Strip Corrosion	1
Water Displacement Test	Pass
Finger Print Neutralization test	Pass
Coverage M <sup>2</sup> /Ltr	75
